

MEDARE Expert Group meeting on *Developing an implementation strategy for building Mediterranean long-term, high quality and homogenised climate datasets* (27-28 September 2012, Istanbul, Turkey)

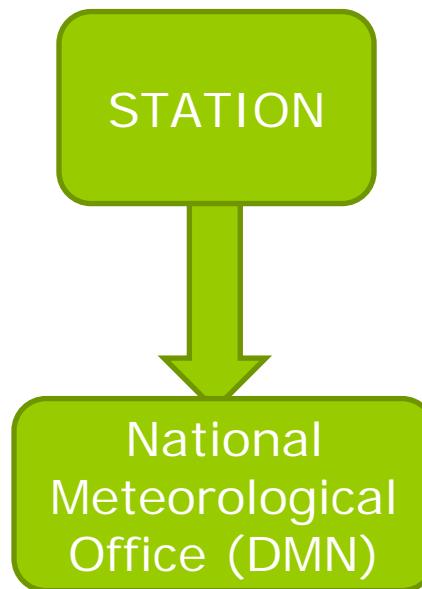

Morocco

*By Fatima Zohra El GUELAI,
Moroccan NMHS*

Climatological data flow

Before 2000

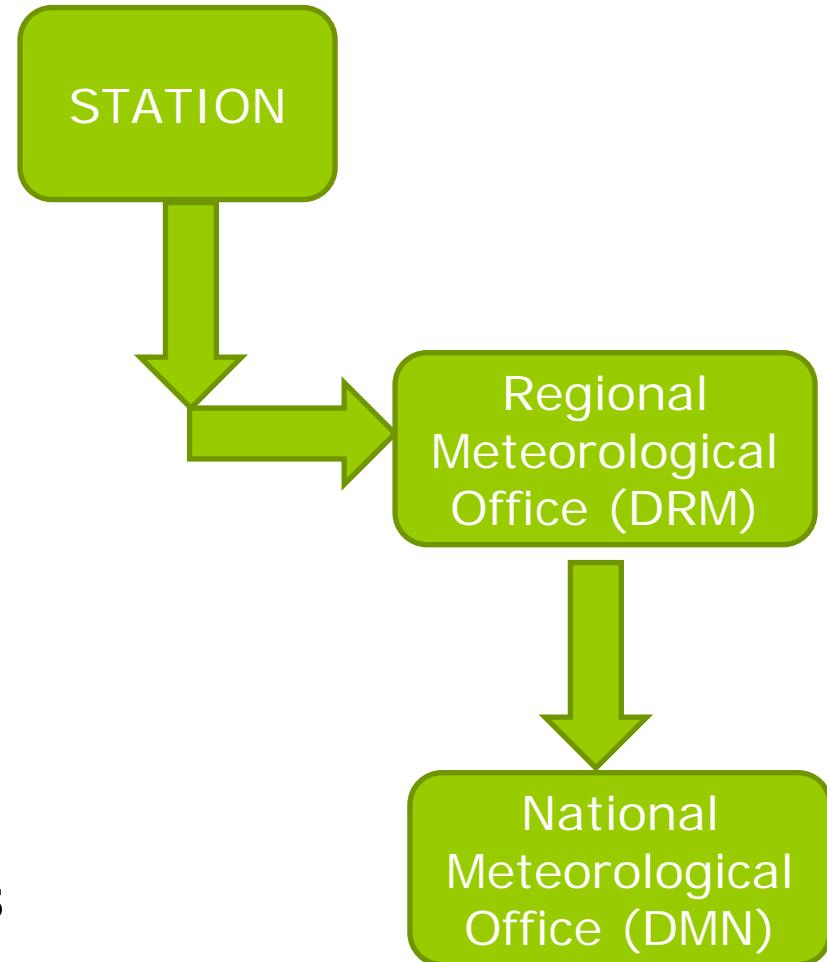

- Paper documents (CRQ, TCM ,...) were sent and archived at the DMN
- Data key entry was done at the DMN
- Data was stored in the CLICOM database

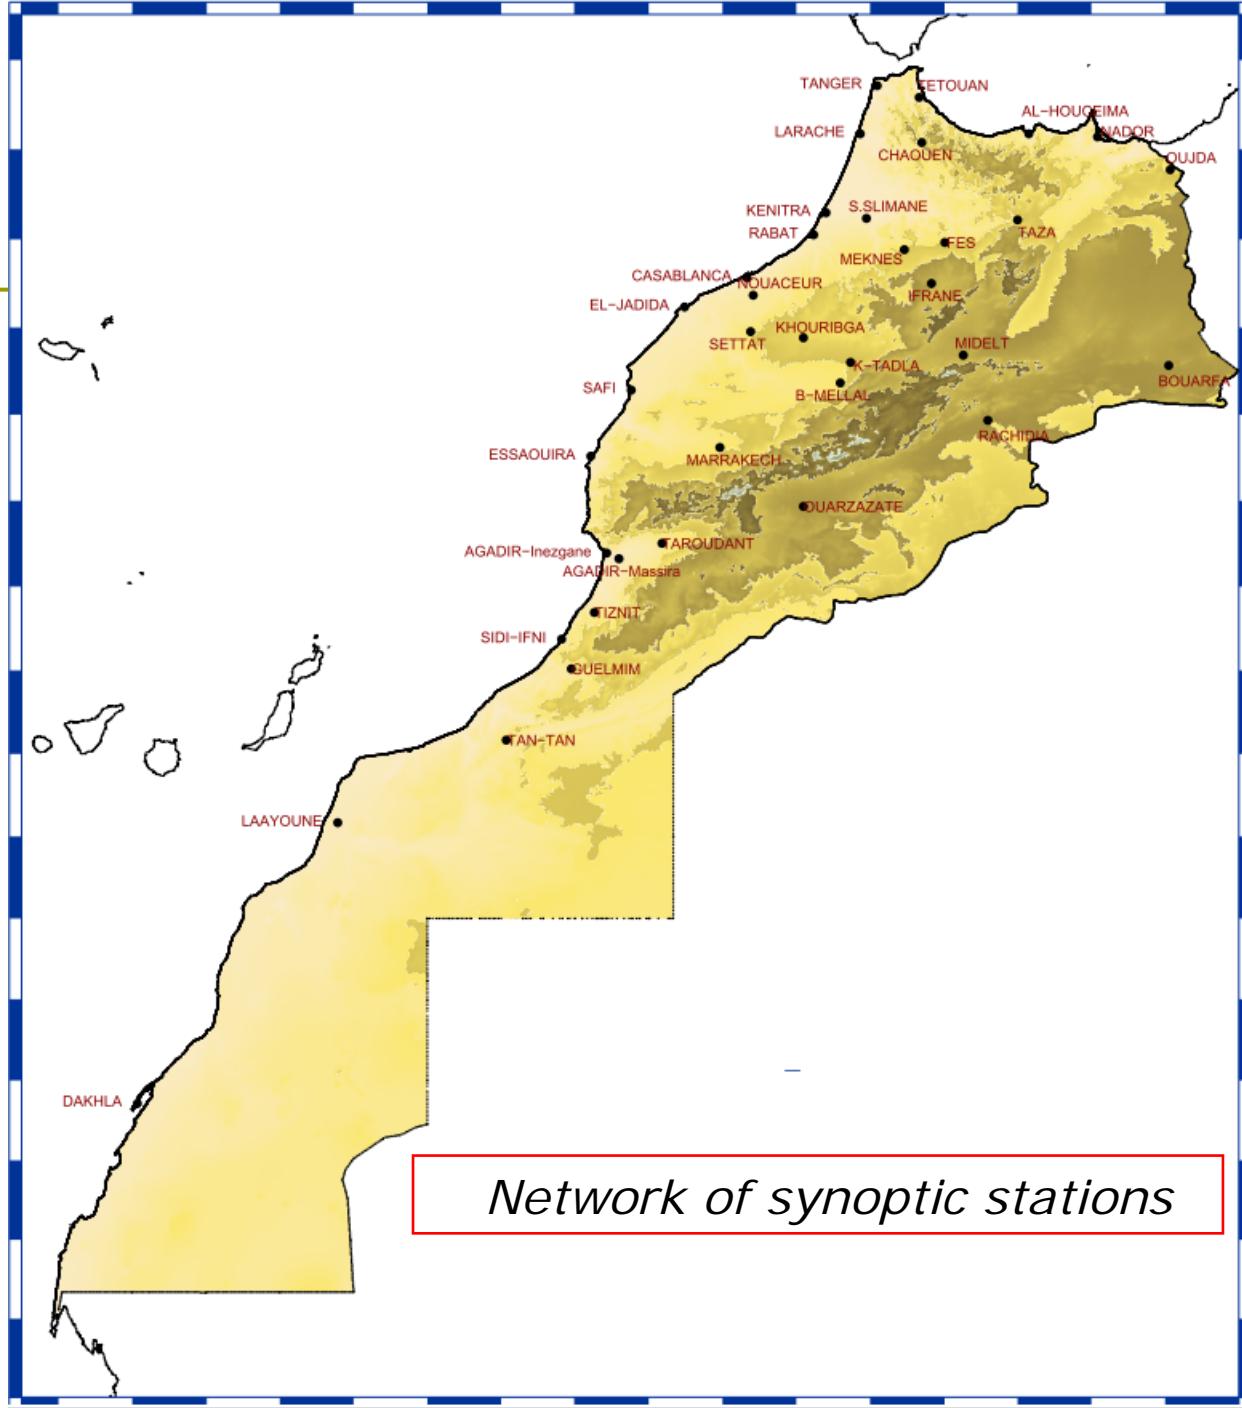

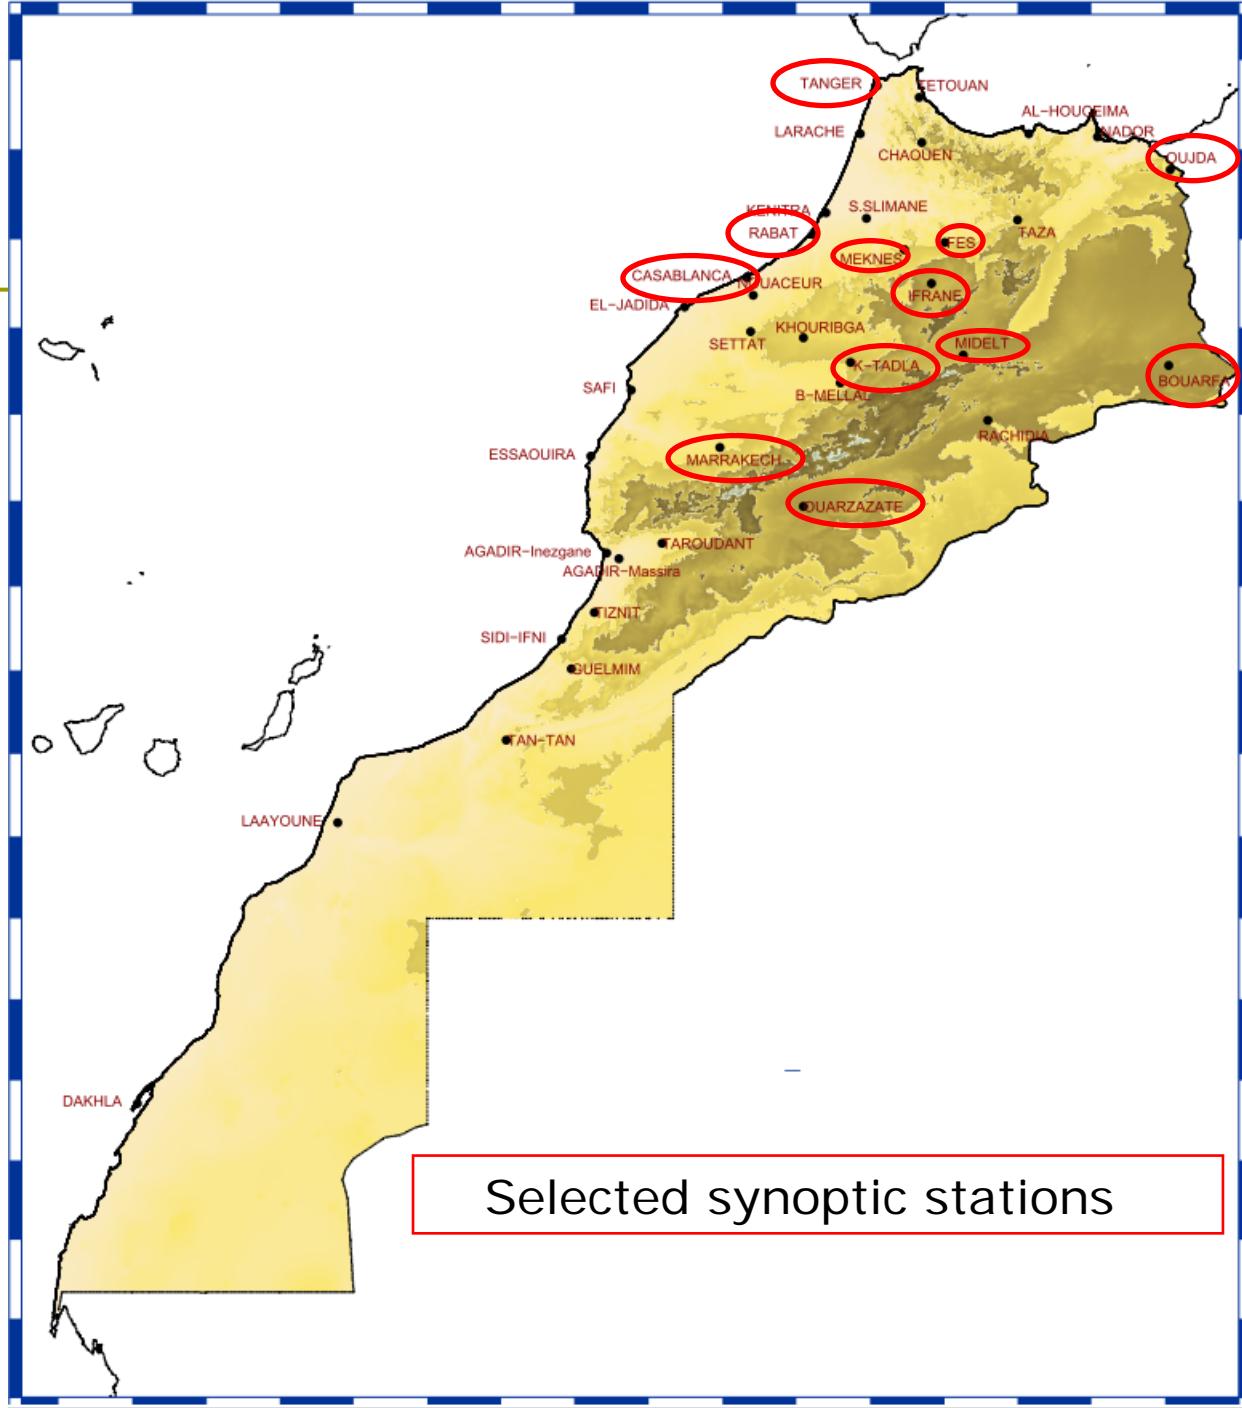

Climatological data flow

After 2000

- Documents (CRQ, TCM ,...) are sent from stations to DRMs (regional center) and archived there
- Data key entry is done at DRMs
- Data is stored in ORACLE database (GDCLIM) at DRMs
- The data entered in the 5 DRMs is integrated into the central base at the DMN

Digitalisation of Hourly Data

□ The DMN has begun since 2009 a project of digitizing hourly data available in the CRQ documents for network synoptic stations with its own funds.

□ The number of digitized CRQ:

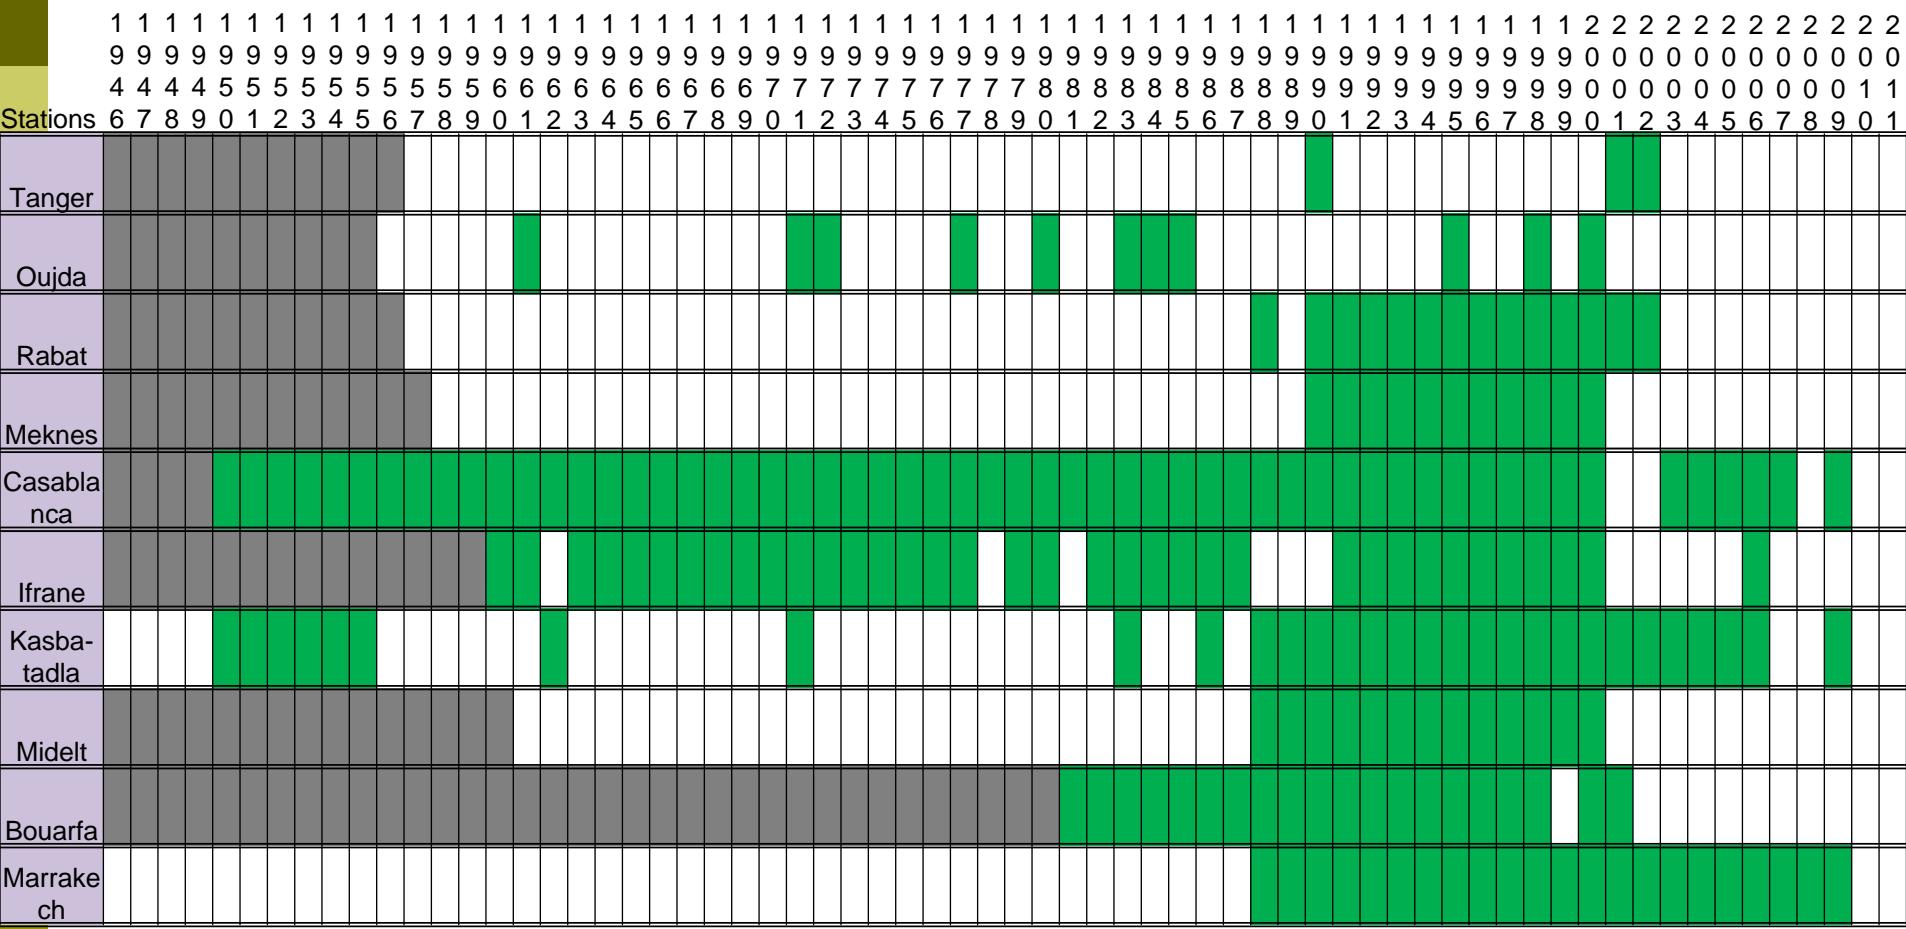

- During 2009 : 65000 CRQ (~ 178 years)
- During 2010: 80000 CRQ (~ 220 years)
- During 2011: 80000 CRQ (~ 220 years)

□ 13 hourly parameters are digitized:

visibility, wind direction, wind speed, time past, time present, SLP, pressure, temperature, humidity, water vapor pressure, total cloud cover , wet-bulb temperature and the dew point temperature

□ Data is not introduced yet into the database GDCLIM. This will be done in the near future, after doing quality control.

Inventory of hourly digitized data

No CRQ Documents

Digitized data

Digitalisation of Daily Data

Almost all daily Temperature and rainfall data is already digitized and is available in the DMN climatological database called GDCLIM since 1960.

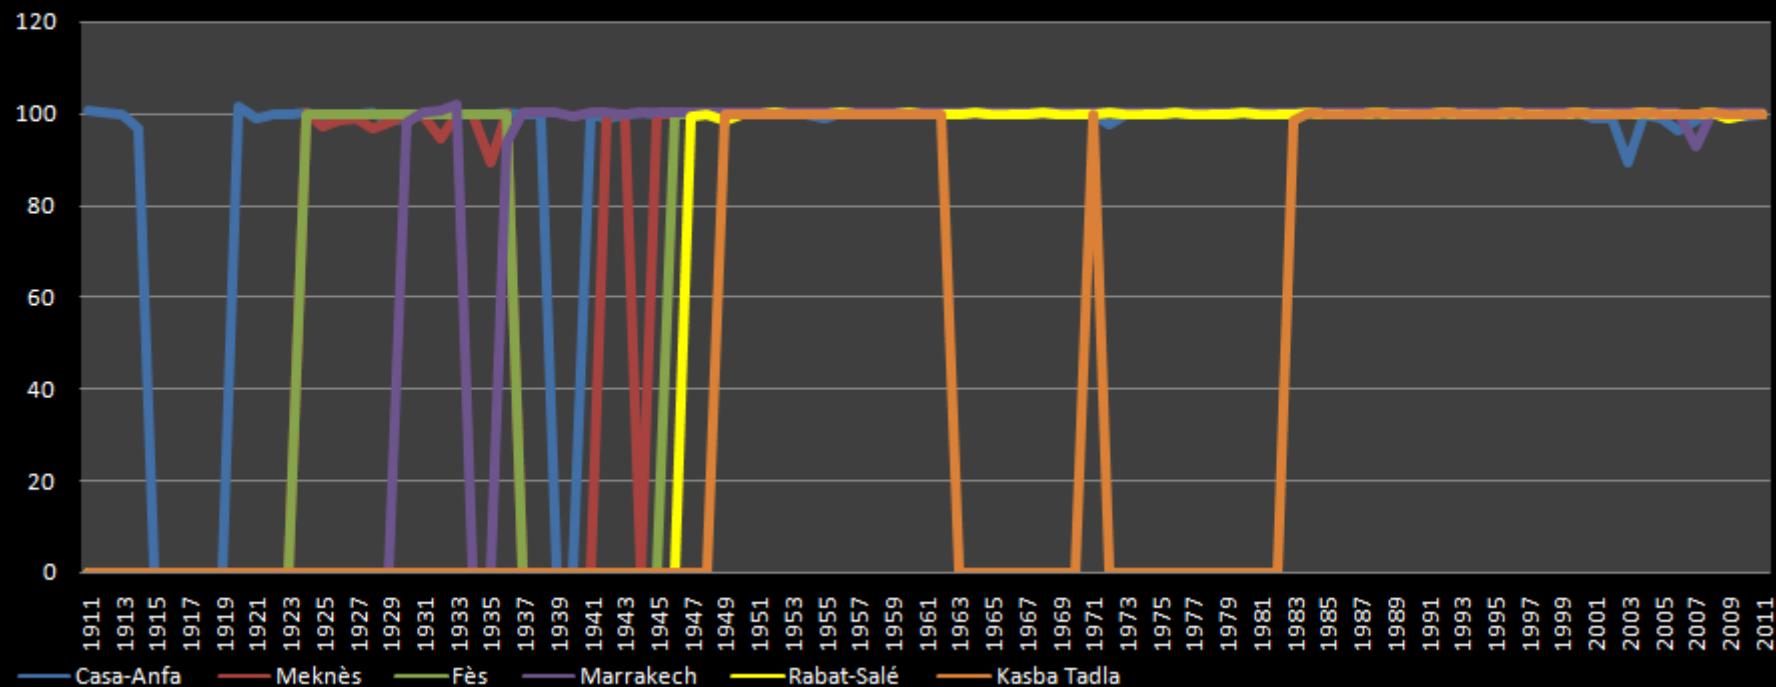

Through International project, many daily data from the TCM microfiche of METEO-FRANCE have been digitized and ingested in GDCLIM

Daily Data: Metadata

STATION	WMO ID	LONGITUDE	LATITUDE	ALTITUDE (m)	PROVINCE	WATERSHED	OPENING DATE	TCM available in MOROCCO
OUJDA	60 115 001	1° 56' W	34° 47' N	465	OUJDA	MOULOUYA	1919	since 1951
MEKNES	60 150 001	5° 31' 22 W	33° 52' 56 N	556	MEKNES	SEBOU	01/01/1922	since 1952

Daily Tmax

Poucentage of availability of Tmax data in GDCLIM

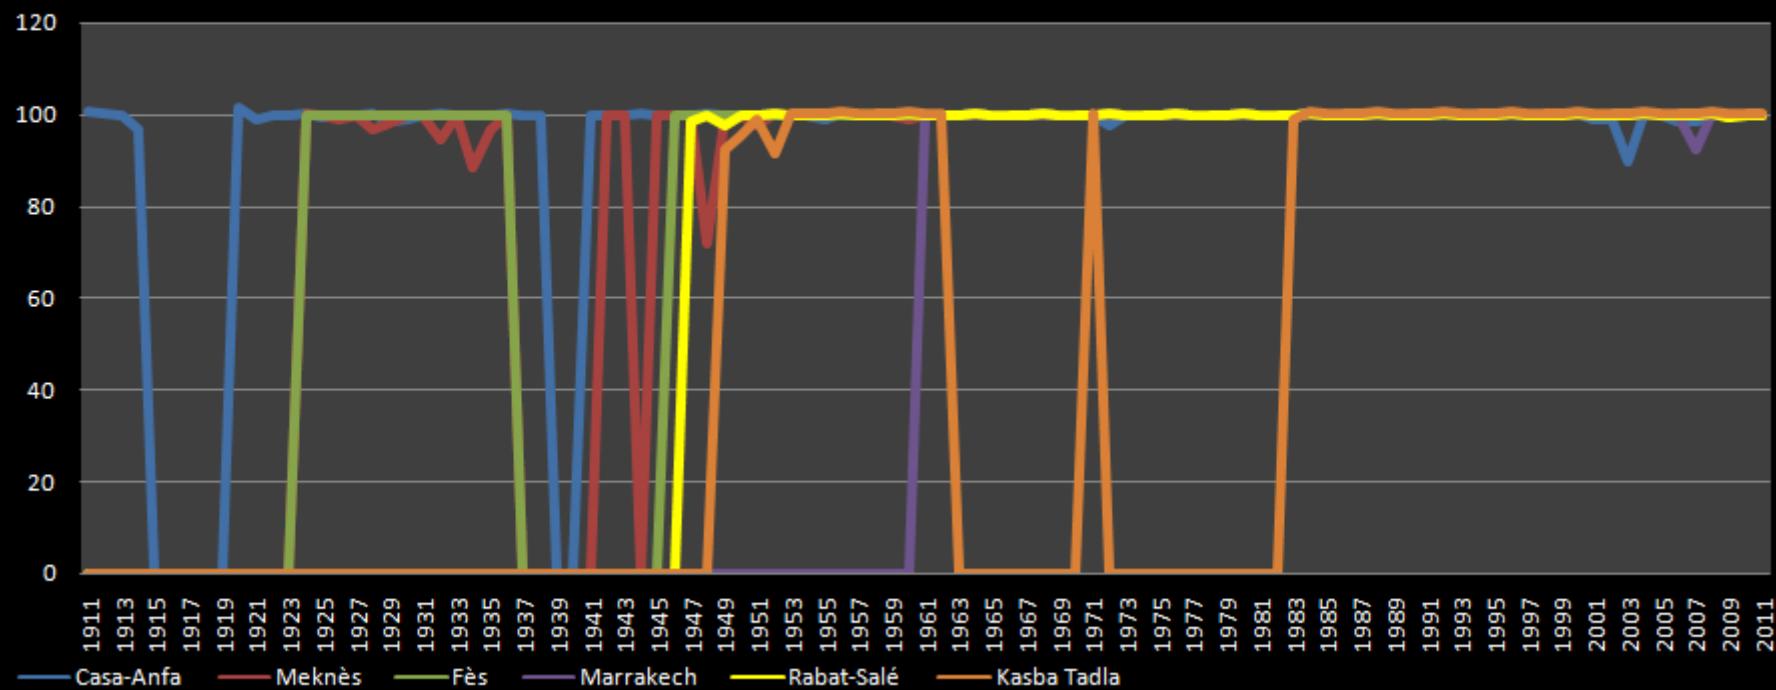

Daily Tmax

Poucentage of availability of Tmax data in GDCLIM (continuation)

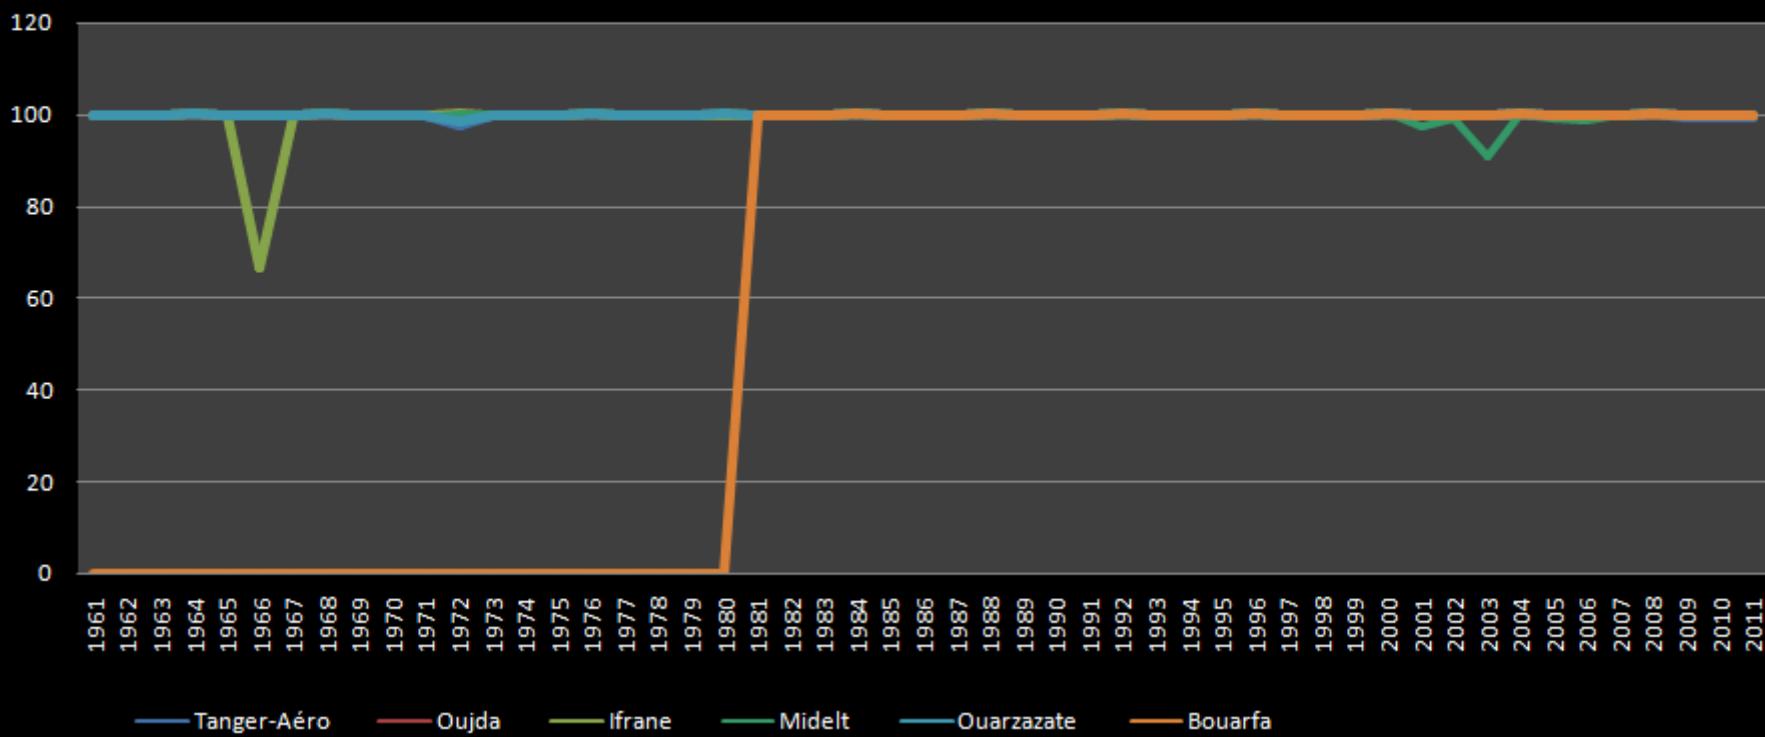

Daily Tmin

Poucenrage of availability of Tmin data in GDCLIM

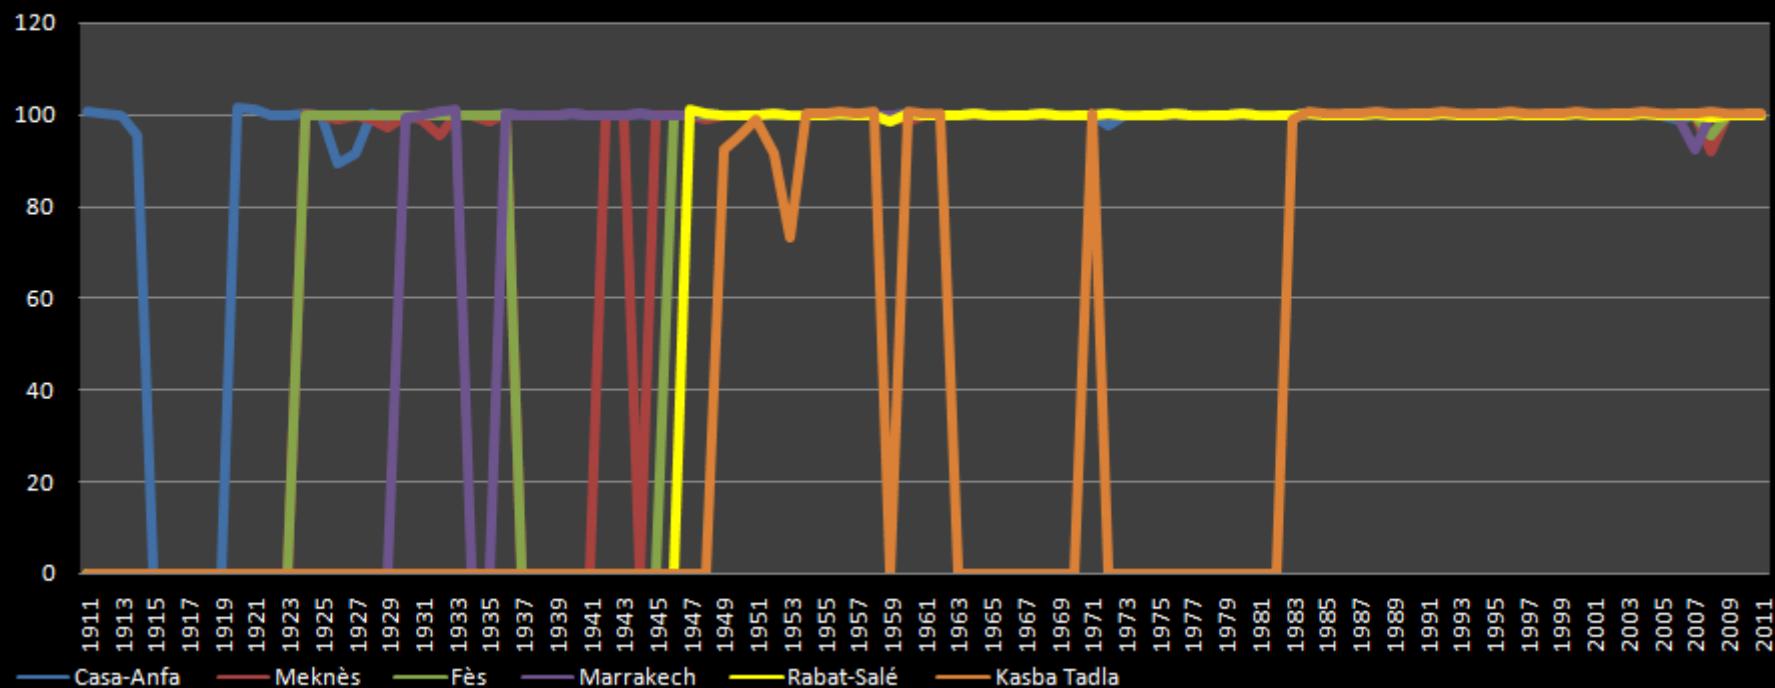

Daily Tmin

Poucentage of availability of Tmin data in GDCLIM (continuation)

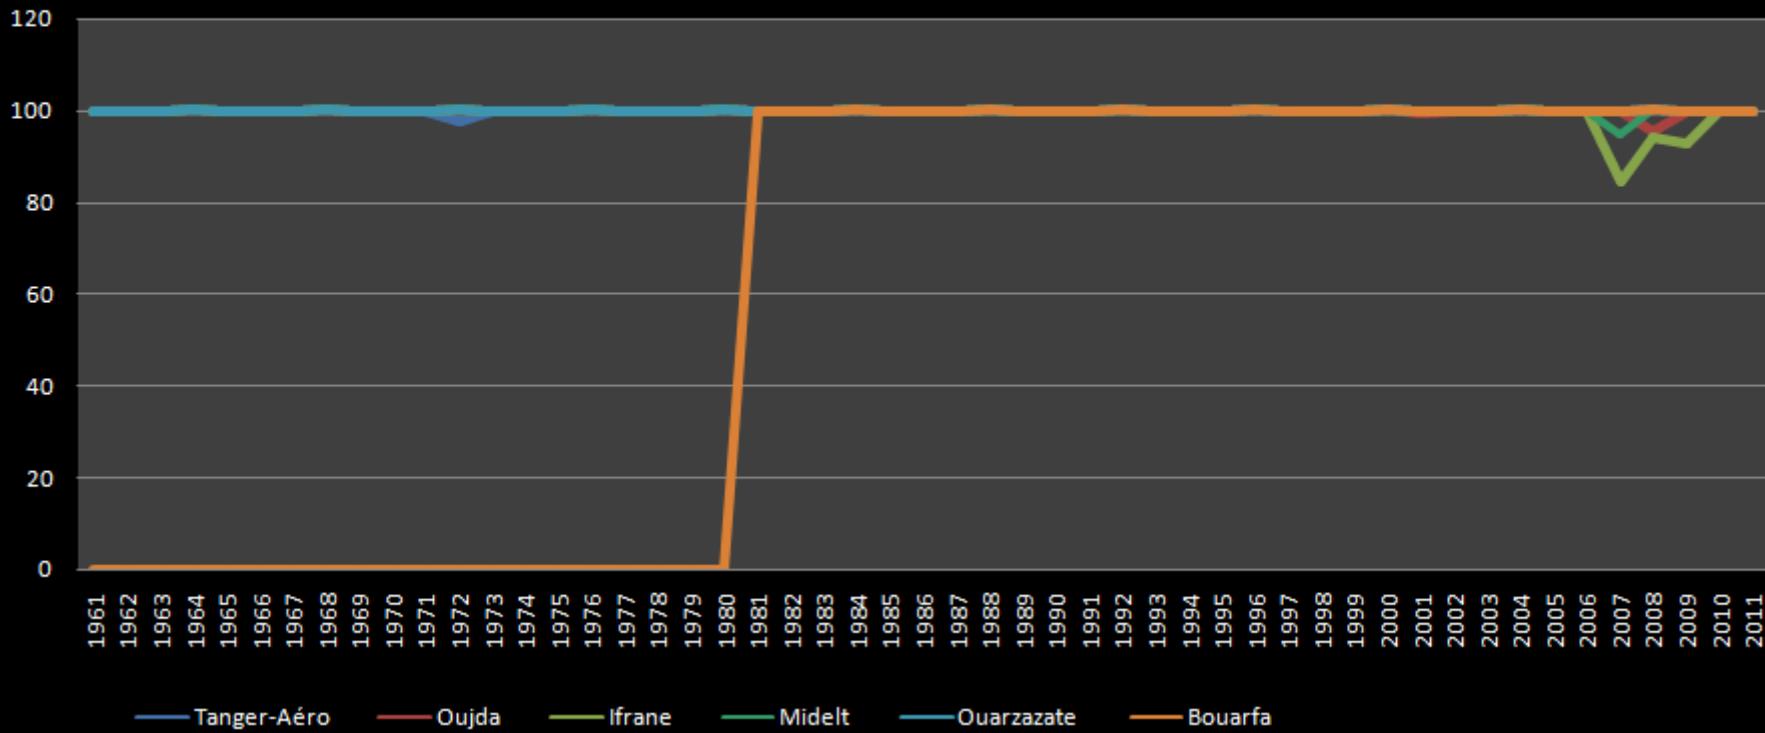

Daily RR

Poucenrage of availability of RR data in GDCLIM

Daily RR

Poucenrage of availability of RR data in GDCLIM (continuation)

Prospect

- Keeping and scanning all of the climatological documents

- The hourly data digitizing operation is stopped after three input phases due to the lack of FINANCING. We must seek external sources FINANCING to follow this task.
